## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 22, drawn to application program interface, classified in class 709, subclass 328.
- II. Claims 8-12, 15-21, and 23-48, drawn to user interface for book metaphor, classified in class 345, subclass 776.

The inventions are distinct, each from the other because of the following reasons:

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, while invention I has separate utility such as the application and publication that form a unitary file in assembly code to address a compatible hardware processor directly and containing a plurality of commands to address sub-routines in a compatible operating system to provide the graphical output on a screen; Invention II has separate utility such as the user interface for a page-turn of a multiple page document. See MPEP § 806.05(d).

A telephone call was made to John C. Holman on 09/10/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2174

Upon the election of the invention to be examined, a non-final office action will follow.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.
